1. This office action, in response to the amendment filed 3/19/2007, is a final office action.

***Response to Arguments***

2. Applicant's arguments filed 3/19/2007 have been fully considered but they are not persuasive. Regarding the 35 USC 101 rejection to claims 1-8, the claims do not claim a concrete, useful and tangible result. The result of claim 1 is that a determination is made if the locally generated pseudorandom code and the incoming pseudorandom code are correlated. Therefore, the claim does not claim a practical application that yields a useful, concrete and tangible result. Regarding the rejections of claims 9-16, the structural components of the spread spectrum receiver are not disclosed in the originally filed specification. The mention of CDMA systems on page 7 of the specification is not sufficient support for the specific receiver claimed in claims 9-16. Page 9 of the specification states, "figure 4 illustrates the method of correlation used in the related art". This does not disclose the specific components to the claims spread spectrum receiver. MPEP 2185 discloses "if a 'means or step plus function' limitation recited in a claim is not supported by corresponding structure, material or acts in the specification disclosure, the following rejections should be considered: (B) under 35 USC 112, second paragraph, as being indefinite."

3. The previous rejection of claim 1 under 35 USC 112, second paragraph, is withdrawn in view of the amendment to claim 1.

For these reasons and the reasons stated in the previous office action, the rejections of the claims are maintained.

A new drawing objection is stated below.

### ***Drawings***

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the components of the spread spectrum receiver recited in claims 9-16 must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Regarding claim 1, the claimed invention is directed to non-statutory subject matter. The instant claimed invention covers the judicial exception (abstract idea or mathematical algorithm). There is no practical application by physical application by physical transformation, and there is no useful, concrete and tangible result. Claims 2-8 are directly or indirectly associated with previous rejected claim 1 and are rejected as well.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 9-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 9, Applicant has invoked 35 USC 112, sixth paragraph. Clearly, there is no corresponding structure that can be found in the specification. See MPEP 2181, section III.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
